

DRESS RITE ARMS

For attachment to our Industrial and Professional forms.

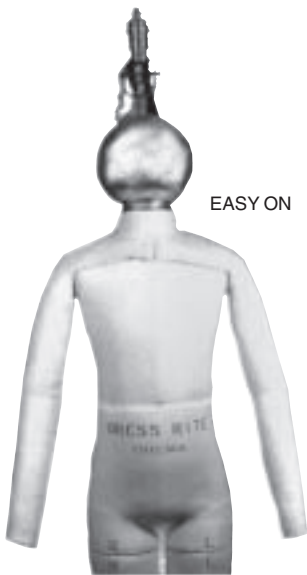

Dress Rite arms are stuffed with Poly Fil® for flexibility. Right and left arms differ with a normal elbow bend. Arms are attached to each other by a yoke which slides over the neck making attachment and removal fast and easy.

Dress Rite arms can be made to any dimension. However, deviations from the standard size chart shown below require a \$30 pattern fee. On the chart, the male sizes are actual, the female sizes include 2" ease at bicep, 1" at elbow, and 1/2" at wrist. Female arms can be made to actual size for no additional cost as can male arms with ease included.

Ease or no ease; advantages and disadvantages. If you are using the form to design and drape, you may want ease included so you can pin the sleeve pieces directly on the arm. If you are using the form to check fit, you will want the arm of actual dimension to see how a real arm will hang in the sleeve.

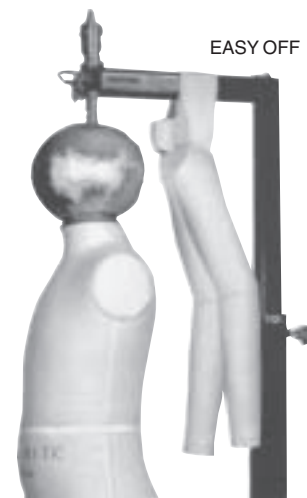

Because the armscye circumference on the body form always includes ease, the arm disc on actual sized arms and armscye disc will not match but show the discrepancy between circumference with ease included and actual circumference.

Children's arms will be made to ASTM standards which show actual dimensions. (The ASTM dimensions are on the back of the children's form brochure.) Generally there is a 1" circumference difference between armscye and upper arm disc on infants, 1 1/4" in sizes 3 to 5, 1 1/2" in sizes 6 to 8, 1 3/4" in sizes 9 to 12, and 2" circumference difference in Juniors and adults. Elbow and wrist are proportional to the upper arm disc.

PRICE: \$200.00 (YOKED PAIR)

FOR SIZING —Take These Measurements

1 Overarm	2 Underarm	3 Cap Height	4 Bicep Circumference + 2" ease	5 Elbow Circumference + 1" ease	6 Wrist Circumference + 1/2" ease
From shoulder seam to wrist	Under armpit to wrist	From shoulder seam to line under armpit	Around upper arm at bicep	Around elbow	Around wrist
